

EXECUTIVE SUMMARY

Technology leader directing enterprise data platform strategy and AI innovation for Fortune 50 logistics operations. Established shipment intelligence foundations serving 15+ retail partners across multi-billion dollar supply chain networks, delivering actionable visibility that drives operational efficiency and customer experience. Led technical evolution from startup scaling through FedEx acquisition, building cross-functional teams and vendor partnerships enabling 1M+ member growth and measurable cost optimization. 20+ years driving platform innovation, organizational transformation, and technology strategy in eCommerce, supply chain, and logistics intelligence domains.

PROFESSIONAL EXPERIENCE

FedEx | Dataworks

Jan 2020 – Present

Fortune 50 Logistics | \$90+ billion revenue | 600K+ employees

Senior Technology Leader | Enterprise Technology Group

- **Directed enterprise shipment intelligence platform strategy** processing 10M+ daily RFID and tracking events, establishing data foundation enabling cross-company analytics standardization and delivering measurable operational insights reducing exception handling costs by 30%+
- **Led Dataworks platform initiative** delivering lakehouse-based shipment visibility to 15+ major retail partners, enabling revenue-generating partnerships and improving customer experience through pre-purchase decisioning and post-purchase tracking capabilities
- **Pioneered enterprise Gen AI governance framework** for logistics use cases, directing vendor evaluation strategy and establishing POC methodology that accelerated AI adoption while maintaining operational risk controls
- **Scaled cross-functional platform organization** from initial team to 15+ engineers, establishing technical standards and vendor partnerships that improved platform velocity 3x while reducing data platform costs 40%+ through lakehouse architecture consolidation

ShopRunner Inc

Apr 2011 – Dec 2025

eCommerce Platform | Acquired by FedEx 2020 | 1M+ members

Principal Engineering Leader | Platform & Data

- **Led enterprise data platform strategy** processing millions of daily eCommerce events, establishing foundation enabling personalization capabilities, analytics-driven decision making, and ML experimentation that contributed to sustained member growth and retention
- **Directed strategic partnerships with American Express and Chase**, architecting secure data sharing ecosystems for co-branded membership programs that delivered 1M+ member acquisitions representing significant revenue expansion
- **Orchestrated technical evolution through organizational transformation** including startup scaling, multiple funding rounds, and Fortune 50 acquisition (FedEx), maintaining 99.9%+ platform stability while eliminating 40% duplicate infrastructure and accelerating insights delivery from days to hours

Earlier Career Highlights

SAE International (2006-2011) · Manugistics / Blue Yonder (2002-2010) · Toyota & Cognizant (1999-2002)

Senior engineering roles in supply chain platforms, automotive standards development, and enterprise applications serving Fortune 500 clients

EDUCATION

Bachelor of Technology (B.Tech), Computer Science Engineering · Anna University · 1995-1999

CORE COMPETENCIES

Strategic Leadership

- Platform Strategy & Roadmap
- Technology Vision & Direction
- Innovation Portfolio Management
- Vendor Partnership Strategy
- Cost Optimization & Efficiency

Organizational Impact

- Cross-Functional Team Leadership
- Organizational Scaling & Transformation
- M&A Technical Integration
- Executive Stakeholder Management
- Technical Standards & Governance

Technical Domains

Logistics Intelligence Platforms · Supply Chain Data Ecosystems · Lakehouse Architecture (Delta Lake, Databricks) · Event-Driven Data Systems · AI/ML Strategy & Governance · eCommerce & Partner Data Platforms
